Date: 21 Apr 2020

**Description of changes to Permit 2006-032 (amended)**

1. The introduction of blasting is only to assist in the liberation of the harder rock. The rip and push operation will still be used for the softer rock, generally the first 10-15m, while blasting will be used for the harder rock. There is no change to the processing (crushing and screening) operation, the development sequencing, the rehabilitation objectives, the rehabilitation plan nor the community engagement plan. A more detailed discussion of the work plan variation is included in the accompanying work plan variation. There will be no explosives (including detonators) store on the site.

2. Planning Permit 2006/032 (amended) was issued on 8/10/2010 for Extractive Industry (Extension to Quarry Work Authority area) Description of changes to the following conditions are sought:

3. Amend condition no. 3 to allow cartage from quarry through hours 7am-1pm on Saturdays and processing within quarry from 7am-5pm Saturdays .

4. Amend condition no. 14 to allow north bound traffic from quarry on an as per need basis.

Regards
