As part of the Our Bellbridge Masterplan, we are further developing and landscaping Roy Williams Park.

We want to create a great place for rest and fun, and ensure the park is accessible and usable throughout the year. This draft plan for the park has been prepared.

The project focus is on walking path connections between different areas of the park, making the most of existing and new recreation spaces, drought tolerant native landscaping, and more shade. This draft plan includes four car parking spaces and a path link from the carpark to existing paths into the park. An additional path link to connect Craig Drive to the CFA shed on Lyndon Avenue is also proposed. Input from community members will support us to access additional funds, as some elements of this draft plan are subject to further funding.

We are keen to hear from community members on our ideas for the park, before we finalise plans. Please join us for a site walk and consultation session to find out more and contribute your input.

Details:
Roy Williams Park Information Session
Tuesday 25 September from 6pm
Berringa Community Centre
Register your attendance by emailing info@towong.vic.gov.au
